

DEVELOPING SIGMAFINE SKILLS

We believe that training is the single most important activity to ensure the success of a Sigmafine deployment and the broad and rapid adoption of this technology.

In order to deliver its full value, training must also address the business context and the organization's challenges.

For this reason, we offer both public and private training sessions designed according to participants' organizational roles and proficiency levels.

Private training sessions can be coupled with customer and project-specific activities to deliver a personalized training program.

Training Locations

Milan, Italy

OBJECTIVE

To become familiar with the Sigmafine data schema in order to use SQL reporting tools to create reports from Sigmafine data. These reports are typically used for enterprise-wide publishing and distribution.

TARGET AUDIENCE

IT professionals responsible for report building and reporting services

OUTLINE

During this class you will learn about:

- How the Sigmafine relational database is structured
- Understanding the relationship between tables and data and identifying the correct tables to store certain information
- How to build procedures and functions to present Sigmafine data efficiently

PREREQUISITES

- An understanding of your company's business requirements in order to apply what you learn from this course to the Sigmafine data reconciliation mandate at your site
- Proficiency in SQL and relevant reporting services (Crystal Reporting, SSRS, etc.)
- Using Sigmafine class (SF-SERV-TR-USE – 2 Days)

FEE

- Private – \$ 3,000 for a class of up to 8 students
- Public – \$ 600 per student

DELIVERABLES

- Course notes and access to a training system
- Training Certificate

REMARKS

This class may be tailored to the specific reporting tool or system your company uses. Contact us to confirm that we support your reporting tool.

Onsite training requires a minimum commitment of 2 training days.

COURSE ID

SF-SERV-TR-REP

DURATION

1 Day
